Fire Risk Assessments

The Regulatory Reform (Fire Safety) Order 2005, came into effect in October 2006, Under the fire safety order older fire certificates are no longer valid and Fire Risk Assessments have to be carried out by every workplace to minimise the risk of fire. If your workplace employs more than 5 persons or is a licenced premise the Fire Risk assessment must be in writing, to aid the review of your risk assessment it is recommended that all businesses fire risk assessments be in writing, the Fire Risk Assessment must include the following:

- Identify the Fire Hazards
- Identify people at risk
- Evaluate, remove or reduce the risks
- Record your findings, prepare an emergency plan and provide training
- Review and update the Fire Risk assessment upon any changes and at least annually.

UK Firesafe have over 25 years' experience in Fire Protection, Fire Prevention and Fire Safety and offer a full Fire Risk Assessment service to aid the Responsible person meet there legislative requirements.

Our fire Risk Assessors are audited and accredited by The UK Fire Association to provide Fire Risk Assessments on both a commercial basis and Direct to consumers and have been entered onto the UKFA approved register.

We offer a range of Fire Risk Assessments to suit your business needs:

- Concise Fire Risk Assessment, suitable for small to medium workplaces covering all legislative requirements in an easy to use format.
- Full Fire Risk Assessment, suitable for larger more complex premises covering all legislative requirements and a full in depth review of Fire Safety measures and Fire Safety Management.
- Full Fire Risk Assessment and Fire Safety Log, additional to the full fire Risk assessment the assessment comes with a full fire safety log book providing additional documents and guidance to aide the responsible person complete all the required recording and documentation.

Fire Safety Training

UK Fire Legislation requires all employers to ensure that all employees are provided with adequate fire safety training on Induction and at least annually.

Fire safety training should include: Action on hearing the fire alarm, Action on discovering a fire, Safety features within premises, Calling the fire service, safe evacuation & types and use of fire fighting equipment.

UK Firesafe provides Fire Safety Training courses to suit your Businesses needs including Fire Safety Awareness Training and Fire Warden / Marshal Training. We provide the courses at your premises from 6 persons upwards, our courses are accredited and audited by the UK Fire Association on both a commercial basis and direct to consumers and have been entered onto the UKFA approved register.

- Safety & PPE Equipment
- And many more items

Electrical Equipment Testing

Portable Electrical Appliance Inspection & Testing

The Law requires all employers to ensure their electrical equipment is maintained in order to prevent danger. Portable appliance testing (PAT) is the term used to describe the formal examination of electrical appliances and equipment to ensure they are safe to use.

PAT testing ensures that portable electrical equipment is safe for use and aides in the prevention of fire as portable electrical appliances are a major cause of fires both in work and the home.

Our engineers are qualified to City & Guilds 2377 in electrical equipment safety to ensure the highest levels of testing are met.
